

Pregnant and using an automated insulin delivery system?

Consider joining a nationwide study of pregnant people with type 1 diabetes. This study is being done to help patients and healthcare providers understand what happens when automated insulin delivery systems are used in pregnancy.

- Here's what the study involves
 - Share your diabetes data with the research team using online platforms
 - Complete surveys about your experience living with diabetes during pregnancy
 - Provide permission to access your medical records
 - Receive gift cards worth up to \$200 for your time and effort
- If you are interested in being in the study or hearing more, please contact the research team
